Concourse
Rehabilitation & Nursing Center

Welcome to Concourse Rehabilitation & Nursing Center.

Concourse Rehabilitation & Nursing Center is a small, intimate facility where patients are known by name. Smiles and friendly greetings are exchanged constantly.

Communication with family and friends, and between staff members, is constant with two goals in mind: help our residents achieve the highest quality of life, help our patients recover quickly and return home.

Upon admission, the needs of every resident are reviewed and assistance is provided in regard to financial considerations, insurance plans, and Medicaid planning.

Every patient situation is regularly reviewed by a team of specialists in medicine, nursing, rehabilitation, nutrition and recreational therapy.

Touring our facility is a great way to feel the warmth.

Dov Lebovic

Dov Lebovic - Administrator

Comprehensive, competent and compassionate care... close by.

If you live anywhere between the Bronx and midtown Manhattan, you're just minutes or less away from the compassionate care and superb medical and nursing rehabilitative services of

Concourse Rehabilitation & Nursing Center. (See the enclosed map.) Parking is just half a block away, and subway and city busses drop you off at our front door.

Highly trained and experienced medical and nursing personnel are available 24-hours a day.

The "D" subway stop, less than 2 blocks away. And we're conveniently located on the treed and landscaped Grand Concourse.

Wound care is under the supervision of a full-time specially trained nurse practitioner.

A short stay, a fond goodbye.

The underlying motivation of our thoroughly trained and fully licensed therapists is simple and straightforward.

They want get you back to full functionality and, if appropriate, on your way home as

quickly as possible. To help them, we have built a state-of-the-art rehab department that surpasses virtually every rehabilitation center in the area.

Every patient's progress is reviewed daily to determine suitability for discharge.

Leaving for home and a good lifestyle.

Our beautifully appointed Activities of Daily Living room enables patients to re-acquire the skills necessary for independent living.

A full and exciting life, inside and out, day in and day out.

After meeting with family members to determine each patient's interests, we individualize his or her participation in recreational activities. The program could call for anything from art and

music therapy and religious services to theme nights, parties and games to sightseeing, museum trips, shopping and boat rides.

Frequent social events and recreational activities are a great way to make new friends.

Games of chance and competitions are favorites for residents of all ages.

Religious services in all faiths are held weekly.

Every month, residents' birthdays are celebrated with elaborate parties and entertainment.

Residents enjoy the fresh air and relaxation of growing flowers on our outdoor patio.

Food service with family flair.

Of all the activities and services we provide, mealtime is undoubtedly the most popular. We take particular pride in the quality and variety of what we serve because we want to do more than provide healthy nutrition. We want our residents to enjoy each and every meal. As much as possible, we

individualize menus to provide favorite foods, while still meeting dietary and nutritional needs. And, since eating with family members makes meals more enjoyable, we invite them to dine as well.

POCKET

Our menus are rich in meats, vegetables and fresh fruits. Ethnic meals, including Glatt Kosher, are served and snacks are provided twice a day.

Barbeques are a frequent treat!

Our dietitian work with every resident to determine favorite foods.
